ADVANTAGES	DISADVANTAGES
Introduction I believe a large class with 45 students is better than a smaller one.	Introduction For many reasons, I think a class with 45 students is not helpful for learning.
1. A large class is more interesting and more fun.	1. A large class is more stressful for the teacher.
2. Students have more chances to help one another.	2. Each student gets less attention from the teacher.
3.	3.
Conclusion For these reasons, I think it is important for schools to keep the number of students at 45.	Conclusion Therefore, I think schools should reduce the number of students in class to fewer than 30.

AGREE	DISAGREE
Introduction I think students should keep learning mathematics no matter how difficult it is.	Introduction Although math is important for some, all high school students don't have to learn mathematics.
1. There are a variety of jobs which need mathematical skills.	1. Students don't use difficult math in everyday life.
2. It improves students' ability to think logically.	2. Students should invest the time spent on solving math problems on more important things for themselves.
3.	3.
Conclusion Consequently, it is necessary for all Korean high school students to learn mathematics.	Conclusion For these reasons, Korean high school students should not be forced to learn math until graduation.

[illegible]

The way we write and send a letter has changed in recent years with the invention of computers and the Internet. Write a one-paragraph essay about how writing a letter today is different from the past that includes the three points in the box. Write around 80 words.

- The way of writing letters in the past
- The way of writing letters nowadays
- The biggest difference between sending a letter and sending an email

Outline

> How did people write letters in the past?

> How do you write letters these days?

> What is the biggest difference between sending a letter and sending an email?

Consider the following statement: The nuclear power plants in Korea should be closed down to protect the environment. Do you agree or disagree? Write a one-paragraph essay that includes the following: an introduction, the two listed ideas, one original idea, and a conclusion. Write around 100 words.

AGREE	DISAGREE
Introduction Although there are already 23 nuclear power plants in Korea, they should be shut down.	Introduction I believe nuclear power plants in Korea should not be closed as long as their safety is guaranteed.
1. Nuclear power is extremely unsafe if it gets out of control.	1. Nuclear power emits significantly less CO2 than other renewable energy sources.
2. It is more important to develop other environmentally friendly energy sources.	2. Renewable energy sources are inefficient for the price.
3.	3.
Conclusion Therefore, Korea's nuclear power plants should be closed down.	Conclusion For these reasons, it is necessary to keep the nuclear power plants.
